

Im writing in regard to Airl radio network. airl has served me in fontana and in victorville for some time now. its part of my commute every day. its a part of every christian family, not only at home but also i my work we listen to it.

if it were to be replaced by a LPFM, not only would it affect me but it would also affect thousands of people. not just in one area but in many different areas of california. airl one is commercial free radio station making it one of the best. if there was to be a LPFM it would provide diffrent programming making christian life different.

i belive that the service provided by airl is a blessing, not only for them playing the music they do but also because there are people out there who get interested in it every day and begin a new relations ship with the lord.

changing it would upset alot of people

please dont remove airl from the radio waves!!
